

Software Requirements Specification (SRS)

Demo Web Shop Web Application

demowebshop.tricentis.com

Version: 1.0

Prepared by:

Mohammed Bazzar

1. Purpose :

This is not a project plan. It is a detailed guide for understanding the system from the user (customer) side only. This document is intended to help testers understand all user flows, fields, validations, and interactions for the Demo Web Shop application.

The document is divided into three main sections:

- Project Overview
- Information Architecture
- Site Design & User Flows

2. Project Overview:

2.1 Audience:

This document is intended as a complete guide for testers using the Demo Web Shop. By reading this guide, you will learn how to interact with every part of the website through the graphical user interface, understand data entry fields, validation rules, and expected system behaviour.

2.2 Hardware and Hosting:

The Demo Web Shop is a publicly hosted demo e-commerce website available at:
demowebshop.tricentis.com

It is designed only for educational and testing purposes. No real orders are placed and no real payments are processed. Testers are strongly recommended to use test/fake data.

3. Information Architecture:

3.1 User Registration Flow

3.1.1 Accessing Registration Page

Users can access the registration page by clicking on Register in the top menu or from the Login page.

3.1.2 Registration Form Fields

The registration form contains the following fields:

Personal Details:

- Gender (Optional – Radio: Male / Female) •
- First Name (Required) •
- Last Name (Required) •
- Date of Birth (Optional – Day / Month / Year dropdowns) •
- Email (Required) •
- Company Name (Optional) •

Newsletter:

- Subscribe to Newsletter (Checkbox – Optional) •

Login Details:

- Password (Required – minimum 6 characters) •
- Confirm Password (Required) •

After filling all required fields and clicking Register, the system:

- Creates the account if data is valid. •
- Redirects the user to the home page with a welcome message. •

3.1.3 Registration Validations

- System rejects registration if any required field is empty. •
- System rejects registration if the email is already registered. •
- System shows clear error messages next to each invalid field. •
- Password and Confirm Password must match. •
- Password must be at least 6 characters. •

3.2 User Login & Logout Flow

3.2.1 Login Page

Users can login via the Login page accessible from the top menu.

Required Fields:

- Email •
- Password •

3.2.2 Login Validations

- Error message appears for wrong password. •
- Error message appears for unregistered email. •
- Successful login redirects to home page with account name shown in header. •

3.2.3 Logout

Logged-in users can logout by:

- Clicking the account name in the top right → Log out. •

The system should return the user to the Home Page.

About login / registration

Put your login / registration information here. You can edit this in the admin site.

3.3 Product Search and Browsing

3.3.1 Home Page

The home page displays:

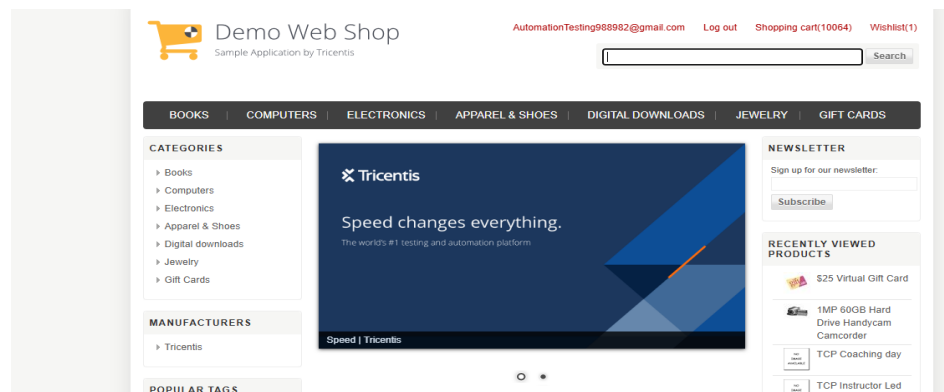

- Featured products
- Best Sellers
- Category menu in the left sidebar
- Search bar at the top

3.3.2 Product Search

Users can enter a product name or keyword in the search box and press Enter or click the search icon.

Expected Behavior:

- Displays grid of matching products with image, name, and price.
- If no results: Shows "No products were found that matched your criteria."

3.4 Cart Flow

3.4.1 Adding Products to Cart

Users can add items from:

- Home page (Quick add) •
- Search results •
- Product Details page •

After adding, a notification appears and the cart counter in the header updates.

3.4.2 Cart Page

Users can open the cart by clicking the cart icon in the header.

On the Cart page, users can:

- View all added items (image, name, unit price, quantity, total) •
- Update quantity of any item •
- Remove item using the Remove button •
- View Sub-Total, Tax, and Order Total •
- Click Checkout button •

3.5Wishlist

Logged-in users can save products to a Wishlist by clicking the Add to Wishlist button on any product details page.

4. System Validation Requirements

- All mandatory fields must be validated on Registration, Login, and Checkout.
- Proper error messages must appear for invalid inputs.
- Cart total must update dynamically when quantity changes.
- Duplicate email registration must be prevented.
- Password must be minimum 6 characters.

5. Non-Functional Requirements

- All pages should load within acceptable time (≤ 5 seconds).
- All clickable elements and input fields must have stable and unique locators.
- The website must work correctly on Chrome browser.
- Responsive behaviour on different screen sizes.
- Consistent design across all pages.
